Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

In response to the response filed 3/19/2004, the action follows:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-4, 7-8, 12 and 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alumot et al (US 5699447).

Art Unit: 2623

With respect to claims 1-4, 7-8, 12 and 15-16 the rejections are respectfully maintained and incorporated by reference as set forth in the prior office action paper number 12.

4. Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alumot (US 5699447) as applied to claim 12 above, and further in view of Alumot et al (US 5982921) (herein after '921).

With respect to claims 13 and 14 the rejections are respectfully maintained and incorporated by reference as set forth in the prior office action paper number 12.

Allowable Subject Matter

5. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 3/19/2004 have been fully considered but they are not persuasive. Applicant argues that the reference Alumot fails to disclose dividing data into columns or the step of dividing each column into data blocks as claimed in claim 1, and data formatter as claimed in claim 12. Examiner disagrees and would like to point

out that the limitations are given their broadest reasonable interpretations. And, in this case, reference Alumot discloses inspection system in that the sensor scan the wafer and the data is read as the column see the figure 12, the sensors 46a-46g are in a line making the data in a column and once the data is read in a column the data is send to the preprocessor and there the data is pre processed and given in the pixel values forming a digital version of the image i.e. the blocks or 3x3 blocks of the image (see col. 9, lines 38-41), i.e. further dividing the data into the blocks as claimed. And the preprocessor is read as the data formatter as claimed in claim 12.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
